I am writing to comment on NAB petition 04-160. I am astounded that such a petition would reach the FCC and be given a hearing. How can an industry such as the NAB petition and receive the government's support to outlaw what their competitors are doing, and doing much better than the NAB members I might add. I am 57 years old and have grown increasingly angry at the drivel and advertising that is available on commercial radio. For the past three years I have been PAYING to listen to satellite radio and I don't mind as the programming is far superior. Now the NAB wants to ban Instant traffic and weather. What a bunch of crybabies. If the NAB members were good at the above, millions of listeners would come back. To ask the FCC to ban those doing a far superior job is overstepping the bounds of government intervention. Let the NAB & members clean up their act by providing better programms and less talk - build it and they will come!!! I urge you to reject the NAB petition 04-160
